### Easy Operation

A single-lever joystick provides easy operation. A regenerative dump circuit allows for fast bucket dumping, and the series circuit provides for simultaneous operation of the boom and bucket.

### Quick Attaching/Detaching

Thanks to Kubota's innovative attaching/detaching system, you can attach and detach mounting pins and hose couplers from the driver's seat, quickly and easily. As a result, you can move from job to job with greater efficiency. Boom-mounted loader stands make access easy and allow the loader to stand alone when detached.

### Front Grille Guard (Standard With Front Loader)

### High-quality Cylinders

The LA524 Front Loader features high-quality, heavy-duty cylinders to bring more muscle to your loader work. The durable plating offers impressive pressure resistance and achieves superior rust protection.

### Optional 2-lever Quick Coupler

Kubota's optional 2-lever quick coupler allows you to quickly and easily attach/detach attachments, all without the use of tools.

### **Protected Hydraulic Lines**

All of the hoses are routed in a recess under the loader lift arm for increased protection.

### **Mechanical Self-levelling**

This feature allows the operator to raise or lower the loader boom while keeping the bucket level to the ground. This will help prevent spills when carrying soil or sand and will make pallet handling smooth and easy.
